附录I 落羽杉不同高度冠层枝条的水力脆弱曲线

Supplement I Branch hydraulic vulnerability curves for canopy at different height in *Taxodium distichum*

A, 15 m. B, 13 m. C, 11 m. D, 9 m. E, 7 m. F, 5 m. G, 3 m. 图中彩色细线代表脆弱曲线的多个重复(重复数 ≥ 8), 黑色粗实线为该高度所有脆弱曲线数据的拟合曲线。

A, 15 m. B, 13 m. C, 11 m. D, 9 m. E, 7 m. F, 5 m. G, 3 m. The colored thin lines represent multiple repetitions of hydraulic vulnerability curves (Repetitions ≥ 8), and the black thick solid lines represent the fitting curve of all vulnerability curve data at this height.
